

PET 2005 Panel on Responsibility of Mix Operators

Hannes Federrath

- Quality of Service
 - Bandwidth
 - Delay
 - Availability
- Transparency and Trust
 - Concept
 - Legal Aspects

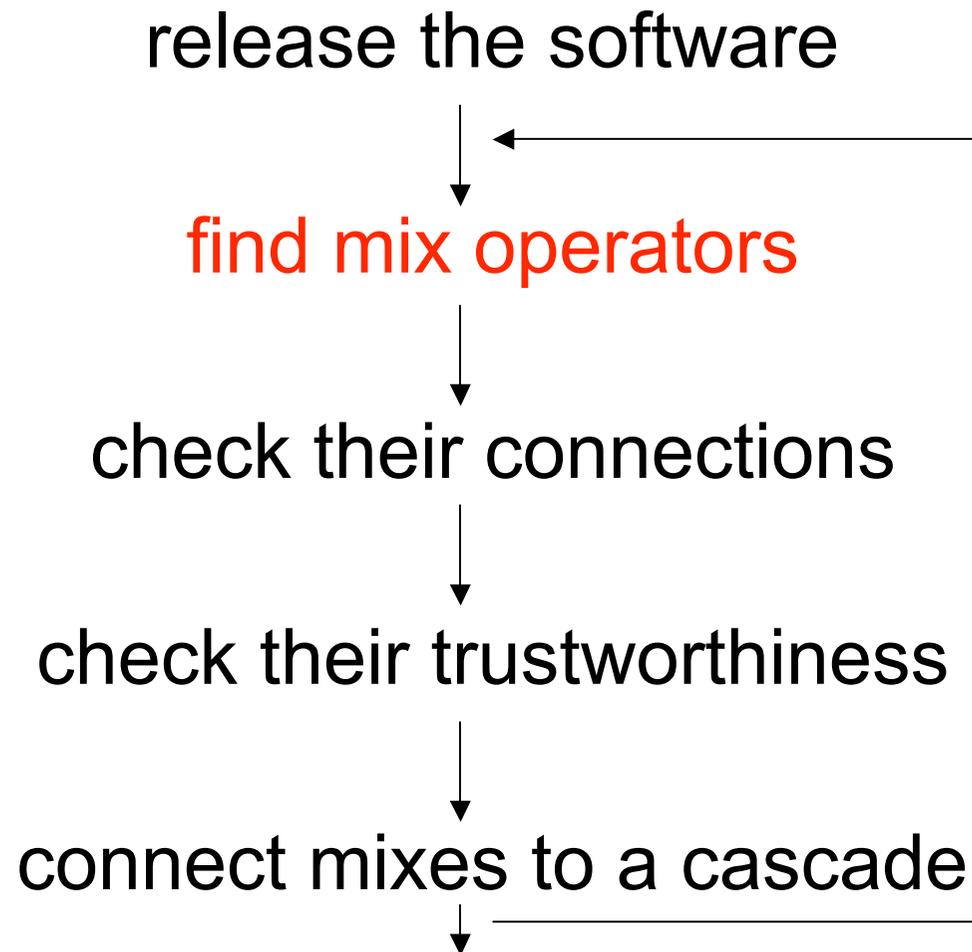

Responsibility of Mix Operators: Quality of Service

- Bandwidth
- Delay
- Availability of service (p · “24/7/365”)

Responsibility of Mix Operators: Transparency and Trust

- Concept
 - should be well defined and published
 - open source
 - no centralized station should be able to control
- Legal aspects
 - Law enforcement

Managed approach: JAP

Unmanaged approach: TOR

release the software ...

... and wait

client does the remaining things:
connect the mixes (free routes)
checks service quality (bandwidth, delay)
